

Abstract

## SERVICE ACCOUNTING SYSTEM AND METHOD

5           The present invention is related to a service  
accounting system (3) containing one or more classified  
service accounts (4), in particular for mobile/cellular  
services. More specifically, a service accounting system  
(3) connected to a main accounting system (1), part of a  
10 main account (2) being transferable to a service account  
(4), and the use thereof are described. The invention  
provides a solution to deal with the accounting of  
differentiated services. In particular a solution is  
provided to give users control over their expenses on a  
15 differentiated service basis. Also to service providers a  
solution is provided to take actions on a differentiated  
services account basis.
